Whose Monet?

Reflecting changes in the structure of contemporary business enterprise, Business Organizations: Cases, Problems, and Case Studies, now in a Second Edition, uses case law, problems, and case studies to examine the role and purview of law in real-life business transactions. This innovative casebook offers: clear descriptions of the development and current state of the law -- up-to-date cases that feature interesting facts, as well as the major must-know cases -- coverage of both modern business structures and growth industries -- engaging business-school-style case studies based on real events encourage in-depth analysis of the application of legal principles in business transactions, and include: extensive facts about the situation and businesses involved -- excerpts from transactional and litigation documents -- short problems that follow selected topics test students understanding of material covered -- separate chapters devoted to limited liability companies and federal securities regulation, including: a detailed case study of Enron and its role in shaping the Sarbanes-Oxley Act -- a rich selection of teaching resources on a password-protected author website: additional transactional and litigation documents related to The cases in the book -- PowerPoints that cover the entire casebook of regular updates -- a detailed and up-to-date Teacher's Manual -- New To The Second Edition: updated materials on Shareholder Proposals -- revised coverage of directors duties, including the Disney case and Stone v. Ritter -- Tooley v. Donaldson on direct versus derivative claims -- new chapter focusing on limited liability companies -- integration of the Restatement (Third) of Agency into Chapter 1 -- A wealth of materials, both in the casebook and on the authors password-protected website, gives you an almost unlimited ability to expand or deepen your exploration of specific topics.

Examples & Explanations for Antitrust

Reorganized for increased accessibility, The 1997 edition of ANTITRUST ANALYSIS presents coverage of current issues with the same incisive -- and effective -- approach that has earned the book its premier reputation in the field. The distinctive emphasis on textual explanations that has always characterized Antitrust Analysis continues in the Fifth Edition. These strong textual discussions convey essential background information and necessary economic principles. Further, less significant cases have been trimmed. The authors' vast expertise in antitrust and economics is shown in a casebook of truly unrivaled quality. ANTITRUST ANALYSIS, Fifth Edition, opens with a clear introduction To The history of antitrust law and a cogent presentation of important economics material. The authors then explore: horizontal agreements monopolization vertical agreements mergers price discrimination Reflecting ongoing movement in the antitrust arena, Areeda and Kaplow now address new developments in: intellectual property health care international aspects of antitrust law
Exploring the Grand Challenges for Next Generation E-Business

Highly respected ADR authors Michael Moffitt and Andrea Schneider bring their considerable experience and expertise to the proven-effective E & E series pedagogy. Dispute Resolution combines introductions to theory with practical exercises in decision analysis, problem solving, and various forms of conflict resolution. Features: Updated and streamlined coverage of arbitration, in light of recent Supreme Court cases Expanded and updated treatment mediation confidentiality, ethics, and the enforcement of mediation agreements Revised materials on Fraud and other negotiation misconduct Includes recent U.S. Supreme Court opinions, state and federal legislative changes, and common contractual modifications Cites and references to principal cases used in most leading casebooks

Antitrust Law in Perspective

Le test du contrôle des concentrations d'entreprises est en pleine remise en question en Suisse. Bon nombre de commentateurs se prononcent en faveur de la transposition dans la Loi sur les cartels (LCart), du droit européen en la matière et de son test SIEC pour « Significant Impediment to Effective Competition ». Cette étude envisage d’abord l’opportunité d’un changement législatif ainsi que le choix d’un éventuel nouveau test. Puis, dans un examen de la pratique de la Conco de 1997 à 2019 en matière de contrôle des concentrations, la thèse présente le test suisse étape par étape et son application sous forme de statistiques. L'auteur confronte ensuite le test suisse au test SLC américain et au test SIEC européen à l'aide de tableaux didactiques et formule enfin une proposition législative.

Handbook of the Law of Antitrust

Examples and Explanations for Antitrust Law, Third Edition is a relentlessly accessible introduction to a body of law that seems foreign and complex but does not at all have to be. By capturing the bigger picture without sacrificing any detail, introducing antitrust economics in a purely intuitive way appropriate for users at any level of economic sophistication, and extensively explaining the real-world context and institutions of antitrust practice, the book brings the law within reach for students of all backgrounds. New to the Third Edition: Incorporation of all significant judicial and legislative developments since 2011 In-depth new coverage of the “two-sided” or “platform” market theory introduced in the Supreme Court’s seminal 2018 decision in Ohio v. American Express Revised coverage of conspiracy, monopolization, and merger law in light of key lower-court decisions, like United States v. AT&T, New York v. T-Mobile, Steves & Sons v. JELD-WEN, Viamedia v. Comcast, SC Innovations v. Uber Technologies, and the Alston NCAA litigation Expanded treatment of advanced antitrust economic theory in a substantially revised Appendix, including a full examination of bargaining theory and other developing models, and their performance before the courts. Professors and students will benefit from: Extensive attention to real-world context Heavy emphasis on accessibility in language and explanation, but backed up with support for economic and legal study by more advanced readers (for example, the Appendix on advanced antitrust economics) A two-step introduction to antitrust economics accessible without any prior background in economics, built on a purely intuitive and non-quantitative introduction supplemented by more formal explanation for more advanced readers

Intellectual Property

Nearly all of the aspects of federal antitrust policy are covered in this book. And it's written so you don't need a background in economics to understand it. Expert narration states the "black letter" law and presents policy arguments for alternatives. Text also includes an analysis of recent Supreme Court and lower-court decisions.

Business Organizations

This extraordinary paperback provides a highly accessible and appealing orientation to the American legal system and presents basic
concepts of civil litigation to first-year law students. Whose Monet? An Introduction to the American Legal System focuses on a lengthy
dispute over the ownership of a painting as a vehicle for introducing students to the basic law school tasks of reading analytically,
understanding legal materials, and working with the common law. The author and his colleagues have used these materials successfully in
their classrooms for many years, ensuring their teachability and effectiveness: Whose Monet? can be used as primary course material in
orientation courses or seminars, as well as collateral reading for in-semester Legal Process or Civil Procedure courses The organization
is logical and straightforward and the accessible writing style--lucid, descriptive, and conversational--is ideal for incoming students
The major events in a lawsuit are considered, and the text sheds light on how the law is applied in a civil dispute, introducing common
law and statutory law and the various courts and their interrelationship (trial/appellate, state/federal) The author draws on judicial
opinions, litigation papers, transcripts, and selections from commentators and various jurisprudential sources, thereby exposing the first-
year student to as broad a spectrum of materials as possible Telling the story of a real lawsuit (DeWeerth v. Baldinger)--from client
intake through trial and various appeals--draws students into the legal process by means of an engaging narrative and makes for a truly
enjoying teaching experience for professors The lawyer's role is examined in both its functional and moral dimensions: What do lawyers do?
What does society legitimately expect lawyers to do? This book is suitable for both classroom and stand-alone assigned reading

Antitrust Laws and Trade Regulation

United States v. Apple

This book on the psychology of white collar criminals discusses various cases of financial crime, while also attempting to delve into the
minds of the criminals in question. The literature on this topic is growing as it gains momentum in the scientific field, as a result of
the extremely negative impact white collar crime has on its victims. Because there is considerable damage and vulnerability from these
crimes, it is important to begin to classify them, and to understand the minds of those that commit these offenses. While the current
literature is not extensive, this work provides a closer look into the various ethical and legal facets of financial crime, and helps to
uncover the social, psychological and neurobiological factors that intersect in the minds of those criminals.

Antitrust Law

Explores the promise and limitations of competitive market dynamics, looking at the threats to competition--cartels, agreements,
monopolies, and mergers--and the laws in place across the US and European Union to safeguard the process of competition.

Antitrust Law in the Online Economy

Reliable guide on antitrust law. Special attention is given to the expanded role of evidentiary standards and the procedural screens in
determining litigation outcomes. A look into recent revisions of public enforcement, immunity-related doctrines, and government
intervention is also included.

Into the Gray Zone

In 2012, when the Justice Department sued Apple and five book publishers for price fixing, many observers sided with the defendants. It
was a reminder that, in practice, Americans are ambivalent about competition. Chris Sagers shows why protecting price competition, even
when it hurts some of us, is crucial if antitrust law is to preserve markets.

Antitrust
A favorite among successful students, and often recommended by professors, the unique Examples & Explanations series gives you extremely clear introductions to concepts followed by realistic examples that mirror those presented in the classroom throughout the semester. Use at the beginning and midway through the semester to deepen your understanding through clear explanations, corresponding hypothetical fact patterns, and analysis. Then use to study for finals by reviewing the hypotheticals as well as the structure and reasoning behind the accompanying analysis. Designed to complement your casebook, the trusted Examples & Explanations titles get right to the point in a conversational, often humorous style that helps you learn the material each step of the way and prepare for the exam at the end of the course. The unique, time-tested Examples & Explanations series is invaluable to teach yourself the subject from the first day of class until your last review before the final. Each guide: helps you learn new material by working through chapters that explain each topic in simple language challenges your understanding with hypotheticals similar to those presented in class provides valuable opportunity to study for the final by reviewing the hypotheticals as well as the structure and reasoning behind the corresponding analysis quickly gets to the point in conversational style laced with humor remains a favorite among law school students is often recommended by professors who encourage the use of study guides works with ALL the major casebooks, suits any class on a given topic provides an alternative perspective to help you understand your casebook and in-class lectures

We, the Robots?

More than any other area of regulation, antitrust economics shapes law and policy in the United States, the Americas, Europe, and Asia. In a number of different areas of antitrust, advances in theory and empirical work have caused a fundamental reevaluation and shift of some of the assumptions behind antitrust policy. This reevaluation has profound implications for the future of the field. The Oxford Handbook of International Antitrust Economics has collected chapters from many of the leading figures in antitrust. In doing so, this two volume Handbook provides an important reference guide for scholars, teachers, and practitioners. However, it is more than a merely reference guide. Rather, it has a number of different goals. First, it takes stock of the current state of scholarship across a number of different antitrust topics. In doing so, it relies primarily upon the economics scholarship. In some situations, though, there is also coverage of legal scholarship, case law developments, and legal policies. The second goal of the Handbook is to provide some ideas about future directions of antitrust scholarship and policy. Antitrust economics has evolved over the last 60 years. It has both shaped policy and been shaped by policy. The Oxford Handbook of International Antitrust Economics will serve as a policy and research guide of next steps to consider when shaping the future of the field of antitrust.

Lessons from the Financial Crisis

By applying the proven Examples & Explanations format to The core concepts of copyright, patent, trademark, and trade secret, noted author Stephen M. McJohn helped thousands of students gain a better understanding of intellectual property. Now, In its Second Edition, INTELLECTUAL PROPERTY: Examples & Explanations keeps pace with recent developments as it continues to clarify this important area of study. Instructors can count on this high-quality study guide to support their primary text: offers complete coverage of all core topics in intellectual property the book is keyed to The major IP survey casebooks and includes enough examples to reinforce any gaps in the text coverage adhering to The effective Examples & Explanations method, each section of the book provides a short account of the law, followed by a variety of concrete examples and explanations which reinforce and give substance to The key rules and concepts the text focuses on the fundamental rules and concepts and remains clear and straightforward by omitting specialized areas modular chapter organization adapts readily to any course structure and allows students to work independently, brushing up on specific topics as needed The Second Edition incorporates a wide range of new material: significant cases, including Grokster, Eldred, Lexmark/Chamberlain, Eolas, Wiredata, Southco, Silverstein, Integra, Knorr-Bremse, Moseley, KP Permanente, Dastar, Patents.com, and Harjo new copyright cases on originality, fair use, scope of rights, moral rights, DMCA, and file sharing new patent law cases on utility, statutory bars, claim interpretation, obviousness, de minimis defense, inherency, and written description new trademark cases on search engine advertising, fair use, 43a post-Dastar, dilution post-Moseley, incontestability, and descriptiveness the Family Entertainment and Copyright Act of 2005 the CREATE Act, changing
obviousness rules for joint research projects developments in intellectual property ownership and licensing the ongoing discussions on reform of the patent system the growing influence of international treaties on domestic IP law trade secret law developments Eldred's effect in both constitutional and statutory law patent subject matter issues, from cloning to natural phenomena refreshed examples and explanations throughout

**Competition and Antitrust Law: a Very Short Introduction**

The Regulatory State, Third Edition is distinguished by a practical focus on how federal administrative agencies make decisions, how political institutions influence decisions, and how courts review those decisions. With coverage tailored to 1L or upper-level courses on the regulatory state or legislation and regulation, Bressman, Rubin, and Stack use primary source materials drawn from agency rules, adjudicatory orders, and guidance documents to show how lawyers engage agencies. Additionally, this book uses an accessible central example (auto safety) throughout to make the materials cohesive and accessible, and presents legislation with attention to modern developments in the legislative process. The Regulatory State, Third Edition also presents statutory interpretation in useful terms, highlighting the “tools” that courts employ as well as the theories that judges and scholars have offered. New to the Third Edition: Expanded discussion of agency methods of statutory implementation and regulatory interpretation Additional primary source materials Up-to-date examination of political and judicial control of agency action New chapter with a case study of the regulatory process using the main example from the book Professors and students will benefit from: Tools-based approach that highlights the methods of analysis that agencies, courts, and lawyers utilize Use of an accessible central example as a familiar entry point into a complex legal area Primary source materials—agency documents, including notice-and-comment rules, adjudicatory orders, agency guidance, and more Empirical data, normative or theoretical questions, and practical examples

**Competition, Effects and Predictability**

Antitrust: Examples & Explanations is designed to be accessible to students with no background in economics, but also sophisticated enough for advanced courses on anti-trust law. Author

**Federal Statutory Exemptions from Antitrust Law**

The third edition of Gavil, Kovacic and Baker’s Antitrust Law in Perspective: Cases, Concepts and Problems in Competition Policy thoroughly updates the second edition. It includes a more accessible treatment of the rule of reason, a further modernized treatment of collusion, the most comprehensive merger chapter available, an innovative new chapter on distribution strategies, and a refreshed and updated treatment of intellectual property and innovation. For the third edition, the authors are joined by former FTC Commissioner Joshua D. Wright, who is now University Professor and Executive Director of the Global Antitrust Institute at the Antonin Scalia Law School at George Mason University.

**Harvard Law Review: Volume 130, Number 5 - March 2017**

This book addresses the question of how competition authorities assess mergers in the Information Communication Technology (ICT) sector so as to promote competition in innovation. A closer look at the question reveals that it is far more complex and difficult to answer for the ICT, telecommunications and multi-sided platform (MSP) economy than for more traditional sectors of the economy. This has led many scholars to re-think and question whether the current merger control framework is suitable for the ICT sector, which is often also referred to as the new economy. The book pursues an interdisciplinary approach combining insights from law, economics and corporate strategy. Further, it has a comparative dimension, as it discusses the practices of the US, the EU and, wherever relevant, of other competition authorities from around the globe. Considering that the research was conducted in the EU, the practices of the European
Commission remain a key aspect of the content. Considering its normative dimension, the book concentrates on the substantive aspects of merger control. To facilitate a better understanding of the most important points, the book also offers a brief overview of the procedural aspects of merger control in the EU, the US and the UK, and discusses recent amendments to Austrian and German law regarding the notification threshold. Given its scope, the book offers an invaluable guide for competition law scholars, practitioners in the field, and competition authorities worldwide.

Antitrust

This book is based on a selection of thoroughly revised and extended best papers from the 8th Workshop on E-Business (WEB 2009) held in Phoenix, AZ, USA, on December 15th, 2009. The 29 papers, which were selected from 70 presentations at the workshop, highlight the enormous developments and potential of e-business at a time when new technologies like cloud computing, collective intelligence, and multi-sided platforms are burgeoning. Among the topics covered are Web-based information systems, RFID and supply chain management, process modeling and standardization, security and privacy issues, social networking and mobility, e-services and market mechanisms, IT portfolio management, and other special topics in e-business such as electronic invoicing.

Examples & Explanations for Antitrust

This title covers international and comparative issues of antitrust law, economics, and policy. It can be used to enrich U.S. antitrust casebooks or by itself for courses on global antitrust. It addresses all major issues of competition law and global competition policy, including extraterritoriality; global norms; cooperation, convergence, and divergence; the state's role in restraining or facilitating competition; process and procedures; and substantive areas including cartels, horizontal and vertical agreements, abuse of dominance, and mergers. It compares developed and developing jurisdictions. It references numerous jurisdictions, including the European Union, China, Japan, India, Russia, South Africa, Tanzania, Zimbabwe, and Latin American countries.

Challenges and Opportunities for the Puerto Rico Economy

With today's rapid changes in worldwide mass communication, it is critical that your library contain a title discussing in detail the legal implications of the new technology. All aspects of the regulation of cable, broadcasting, satellite and the Internet, including access, franchising, programming, compatibility, cross-ownership and privacy issues are discussed. New technologies, including High Definition Television (HDTV), Satellite Master Antenna Television (SMATV), Direct Broadcast Satellite (DBS) and Multipoint Distribution Service (MDS); and traditional legal issues adapted for new technologies, such as antitrust, securities and taxation are also covered. The price quoted for the work, which is updated twice annually, covers one year's worth of service.

Antitrust Law and Economics in a Nutshell

After your casebook, a Casenote Legal Brief is your most important reference source for the entire semester. The series is trusted for its expert summary of the principal cases in your casebook. Its proven reliability makes Casenote Legal Briefs the most popular case brief series available. With more than 100 titles keyed to the current editions of major casebooks, you know you can find the help you need. The brief for each case saves you time and helps you retain important issues. Each brief has a succinct statement of the rule of law/black letter law, description of the facts, and important points of the holding and decision. Quicknotes are short definitions of the legal terms used at the end of each brief. Use the Glossary in the end of your text to define common Latin legal terms. Such an overview, combined with case analysis, helps broaden your understanding and supports you in classroom discussion. Each title is keyed to the current edition of a specific casebook; it's your trusted guide to the text throughout the semester. The brief for each principal case in the casebook saves you time and helps you retain important issues. Each brief has a succinct statement of the rule of law/black letter law,
Financial Crimes: Psychological, Technological, and Ethical Issues

Global Issues in Antitrust and Competition Law

In the US and EU, legal analysis in competition cases is conducted on a case-by-case approach. This approach assesses each particular practice for both its legality and its welfare effects. While this analytic method has the merits of 'getting the result right' by, inter alia, reducing error costs in antitrust adjudication, it comes at a cost of certainty, predictability and clarity in the legal principles which govern antitrust law. This is a rule of law concern. This is the first book to explore this tension between Europe's 'More Economic Approach', the US's Rule of Reason, and the Rule of Law. The tension manifests itself in the assumptions in and choice of analytic method; the institutional agents driving this effects based approach and their competency to use and assess the results of the methodology they demand; and, the nature and stability of the legal principles used in modern effects-based competition analysis. The book forcefully argues that this approach to competition law represents a threat to the rule of law. Competition, Effects and Predictability will be of interest to European and American competition law scholars and practitioners, legal historians, policy makers and members of the judiciary.

Behavioral Law and Economics

Casenote Legal Briefs for Antitrust, Keyed to Sullivan, Hovenkamp, and Shelanski

The world's best financial minds help us understand today's financial crisis With so much information saturating the market for the everyday investor, trying to understand why the economic crisis happened and what needs to be done to fix it can be daunting. There is a real need, and demand, from both investors and the financial community to obtain answers as to what really happened and why. Lessons from the Financial Crisis brings together the leading minds in the worlds of finance and academia to dissect the crisis. Divided into three comprehensive sections-The Subprime Crisis; The Global Financial Crisis; and Law, Regulation, the Financial Crisis, and The Future-this book puts the events that have transpired in perspective, and offers valuable insights into what we must do to avoid future missteps. Each section is comprised of chapters written by experienced contributors, each with his or her own point of view, research, and conclusions Examines the market collapse in detail and explores safeguards to stop future crises Encompasses the most up-to-date analysis from today's leading financial minds We currently face a serious economic crisis, but in understanding it, we can overcome the challenges it presents. This well-rounded resource offers the best chance to get through the current situation and learn from our mistakes.

The Regulatory State

Economic analysis of law: an overview -- Behavioral studies -- An overview of behavioral law and economics -- Normative implications -- Behavioral insights and basic features of the law -- Property law -- Contract law -- Consumer contracts -- Tort law -- Commercial law -- Administrative, constitutional, and international law -- Criminal law and enforcement -- Tax law and redistribution -- Litigants' behavior
Modern antitrust law is global antitrust law. Markets are becoming increasingly global, or at least multinational. This volume examines US and EC competition law cases and decisions within a common analytical framework strongly based on economic theory.

Principles of Antitrust

This book provides cases and materials from the online economy in each of the major areas of antitrust. Broadly speaking, it contains cases addressing two types of issues: e-commerce (1-800 Contacts, Google Shopping, Ohio v. American Express, etc.) and intellectual property issues related to the online economy (FTC v. Qualcomm, Huawei v. ZTE, etc.). The book is ideal for a seminar, but it can also be used as a supplement in a traditional antitrust course. To facilitate using the book, it includes short descriptions of the doctrinal background for the materials provided. The book includes more secondary materials (on algorithmic collusion, personalized pricing, etc.) than is typical of a casebook, because some of these issues have not yet given rise to cases suitable for inclusion. The book also includes more European materials than is usual for a U.S. antitrust book, given that the EU and its member states have been at the forefront of antitrust enforcement in these areas; it provides additional context for U.S. antitrust students or lawyers to appreciate the European materials. The second edition includes, in addition to other updates to the first edition, materials on the Google and Facebook complaints filed by US enforcers and on the EU’s Digital Markets Act and Digital Services Act.

Eurasian Cities

In this startling and thought-provoking book, which will remind readers of works by Oliver Sacks and Atul Gawande, a world-renowned neuroscientist reveals his controversial, groundbreaking work with patients whose brains were previously thought vegetative or non-responsive but turn out-in up to 20 percent of cases—to be vibrantly alive, existing in the “Gray Zone.” Into the Gray Zone takes readers to the edge of a dazzling, humbling frontier in our understanding of the brain: the so-called “gray zone” between full consciousness and brain death. People in this middle place have sustained traumatic brain injuries or are the victims of stroke or degenerative diseases, such as Alzheimer’s and Parkinson’s. Many are oblivious to the outside world, and their doctors believe they are incapable of thought. But a sizeable number are experiencing something different: intact minds adrift deep within damaged brains and bodies. An expert in the field, Adrian Owen led a team that, in 2006, discovered this lost population and made medical history. Scientists, physicians, and philosophers have only just begun to grapple with the implications. Following Owen’s journey of exciting medical discovery, Into the Gray Zone asks some tough and terrifying questions, such as: What is life like for these patients? What can their families and friends do to help them? What are the ethical implications for religious organizations, politicians, the Right to Die movement, and even insurers? And perhaps most intriguing of all: in defining what a life worth living is, are we too concerned with the physical and not giving enough emphasis to the power of thought? What, truly, defines a satisfying life? This book is about the difference between a brain and a mind, a body and a person. It is about what these fascinating borderlands between life and death have taught us about being human.

Global Competition Law and Economics

Using the proven technique of the Examples & Explanations series, this comprehensive guide combines textual material with well-written examples, explanations, and questions to test student comprehension of the materials and provide them with practice in applying information to fact patterns. Thorough in its coverage, Examples & Explanations: Federal Income Tax, Fifth Edition, makes use of case, statutory, and regulatory analysis to provide students with a complete understanding of Federal Income Tax Law. Special attributes of this highly regarded paperback include: Compatibility with numerous casebooks – students can use this guide to supplement any tax casebook

**IP and Antitrust**

**Federal Income Tax**

The authors review Puerto Rico's economic history and provide analysis following the 2017 hurricane season that serves as the context for a set of principles and actions in the recovery plan for rebuilding a healthy economy.

**Promoting Competition in Innovation Through Merger Control in the ICT Sector**

**Business Organizations**

A concise student treatise on antitrust that includes the basics of the microeconomic foundations on which modern antitrust doctrine is built. Many students stumble trying to disentangle economic theory from doctrine, and this treatise expertly blends the two, clearly and concisely defining the terms and basic concepts that all antitrust students need to know. Author Daniel Crane is well regarded for his antitrust scholarship. Comprehensive overview of the major antitrust statutes, including Sherman, Clayton, FTC, Robinson-Patman, and Hart-Scott-Rodino Acts, including substantive operation, antitrust immunities, and questions of standing and jurisdiction. Nontechnical explanations of economic theories for students without economics background. Orientation on how to triage and analyze antitrust problems, such as distinctions between unilateral and coordinated behavior and vertical and horizontal arrangements. Systematic examination of 2010 Horizontal Merger Guidelines with illustrations from litigated cases.

**Antitrust Analysis**

Every day, corporations are connecting the dots about our personal behavior—silently scrutinizing clues left behind by our work habits and Internet use. But who connects the dots about what firms are doing with all this information? Frank Pasquale exposes how powerful interests abuse secrecy for profit and explains ways to rein them in.

**The Black Box Society**

Eurasia has gone through tremendous changes over the past 20 years, which are impacting the function and the form of its cities. Looking ahead, policy makers need to promote the changes that will make Eurasian cities the main drivers of Eurasia’s growth, via better planning,
connectivity, greening, and new financing.

**Antitrust**

*Business Organizations, Second Edition* is a pedagogically rich book that recaptures student engagement in the course without sacrificing basic rigor. The traditional coverage of most books in the field is retained, but modernized in reflecting the importance of unincorporated entities and small business counseling problems. Transaction-oriented problems put the student in the practice role of advising a variety of businesses. An expository approach provides clear context for cases. Features include flowcharts, connections boxes, self-testing exercises, an interspersed series of exercises on ethics for business lawyers, a glossary of terms, and sidebars on numerical concepts and skills. Through the use of side-bar explanations or otherwise, the chapters or major sections of chapters in the book stand alone, facilitating teaching in almost any order. An online supplement includes a “business concepts for lawyers” module to be assigned as an instructor desires, as well as a variety of sample documents to show students the actual materials that lawyers work with every day.

New to the Second Edition: Major revisions to incorporate important statutory modifications: Book-wide revisions to incorporate 2016 Model Business Corporations Act amendments Book-wide revisions to incorporate amendments to the Revised Uniform Partnership Act and amendments to several other ALI model statutes for unincorporated entities, including the revisions made under the ALI’s “harmonization project” Revisions to reflect significant changes in the exemptions from registration under the Securities Act of 1933 Updates to reflect the 2017 Tax Cuts and Jobs Act New cases, including Alexander v. FedEx and O’Connor v. Uber (dealing with the agency relationship of delivery companies and their drivers); Browning-Ferris Indus. (addressing the possibility of joint-employer status in situations involving temp agencies); and Salman v. U.S. (new decision of the Supreme Court having to do with insider trading) Newly written substantive materials, including an entirely new section on the “gig” economy, added to Ch. 4; and new material on the ability of shareholders to adopt bylaws affecting the management of business Shorter cases to bring down page length and respond to adopter requests Improved integration of the text and its online companion material Professors and students will benefit from: Modularity—achieved by keeping chapters short and self-contained—so that the book can be adapted to professors’ different priorities Substantial material provided for free in an online supplement, to reduce overall student costs, including: A set of complete edited codes to support all readings in the casebook; and A module comprising a “business concepts for lawyers” guide, covering tax, accounting, financial and economic topics keyed directly to the book. Detailed, problem-focused treatment of unincorporated entity issues and special transactional problems in counseling small businesses Visual and pedagogical elements (including teaching and learning aids such as flow-charts and self-testing devices) that are designed to engage a generation of students and teachers accustomed to variety and visual appeal Special cross-referencing aids to emphasize connections among related topics An expository approach providing clear context for the traditional case material that also appears Easy-to-digest sidebar content intended to develop student numeracy strength in tax, accounting and other relevant concepts

**Le contrôle des concentrations d’entreprises**

Explains how artificial intelligence is pushing the limits of the law and how we must respond.
